## Nilfisk-ALTO Cleaning with a smile – Why Compromise

Customer understanding and market knowledge combined with global research and technological improvements are the driving forces in the manufacture of dedicated and reliable high quality products.

Product innovation is one of our core values. We continuously increase our product development activities to launch innovative, reliable and competitive products which support our end-users and reduce their total cost of cleaning making our common business grow.

In our 2006 Catalogue you will find a range of products, accessories and detergents, which meet our end-users' precise cleaning requirements. Furthermore, you will also find new products within all product segments.

Our new compact hot and cold water pressure washers - the NEPTUNE 4 and POSEIDON 3 series, offers excellent value at attractive prices. The ALPHA BOOSTER will be introduced to cover the same demands in the stationary product segment.

In the floor cleaning area, we are launching a new range of sweepers, FLOORTEC as well as a new range of scrubbers, SCRUBTEC. These will be launched both as walk-behind and ride on versions.

For light commercial and consumer use we are pleased to launch a new reliable and high quality AERO wet & dry vacuum cleaner range. This also includes the new BUDDY, which should be standard equipment in any private household.

We are also launching new compact high pressure washers in the Consumer segment of our business, which offer new features and live up to our ease of use standards.

We are committed to the further development of our product offering and aim to provide our customers and end-users with products designed to meet their requirements for high quality products, which fulfil their needs for perfection in cleaning.

Nilfisk-ALTO  
Why Compromise

Yours sincerely

Jørgen Jensen
